

TRACK LEVELLING SYSTEM

NDO

Additional levelling module

Powerful track levelling system improves the accuracy of tamped track
Radio-controlled operation
Automatic tilt control

TRACK LEVELLING SYSTEM

NDO

Your benefits

- Powerful lift guaranteed by two rail clamps and ensures accurate track levels
- Radio remote control provides simple operation and increased autonomy
- Automatic tilt control with electric inclinometer
- In combination with the MB8 AC tamping machine, the NDO system ensures the quality and accuracy of the finished tamped track
- Replaces traditional mechanical or hydraulic jacks at a lower price than a ride-on tamping machine

Specifications

Track gauges	1,000, 1,067, 1,435, 1,520, 1,600, 1,668, 1,676 mm
Maximum pressure	200 bar
Flow rate	80 l/min
lifting capacity	20 t
lifting stroke	700 mm (27.56 in)
Dimensions (L x W x H)	1,160 x 2,500 x 1,640 (46 x 98 x 65 in)
Mass	≈ 1,000 kg (2,205 lbs)
